#### (क) विगत बर्षको कारोबारको सिंहावलोकन :

विगत वर्षमा कोभिड-१९ को त्रासिदयुक्त वातावरणले सारा विश्वलाई नै प्रभावित पारेको तथ्य हामी सबै सामु जगजाहेर नै छ । नेपाल पिन कोभिड-१९ को समस्याबाट निरन्तर प्रभावित हुन पुग्यो । कोभिडको कारण नेपाली जनजीवन नराम्रो गरी प्रभावित भयो । यसबाट नेपालको समग्र सामाजिक व्यवस्था र अर्थतन्त्रमा गम्भिर असर पुग्न गएको हामी सबैले थाहा पाएको विषय हो । विगत वर्षमा कोभिडले पारेको प्रभावबाट कम्पनीको बीमा व्यवसाय पिन प्रभावित हुन गएको अवस्था छ । यद्यपी स्वास्थ्य सुरक्षाका मापदण्डहरु अपनाउँदै निरन्तर अनलाइन मिटिङ गरी कम्पनीले व्यवसाय विस्तारमा जोड दिएको कारण व्यवसाय निरन्तर बृद्धि हुदै गएको देखिन्छ । विगत तीन वर्षको व्यवसाय विस्तारको आँकडालाई हेर्ने हो भने आ.व. २०७४।७५ को अवधिमा कम्पनीले रु. ८६,४०,४६,२५२।- प्रथम बीमाशुल्क संकलन गर्न सफल भएको थियो भने आ.व. २०७५।७६ को अवधिमा रु. ३,०५,२५,४,९,९८८।- बीमाशुल्क संकलन गर्न सफल भएको छ । त्यसैगरी आ.व. २०७६।७७ मा रु.४,६७,८५,८९,०२२।- बीमाशुल्क संकलन गर्न सफल भएको देखिन्छ । आ.व. २०७८।७९ को चैत्र मसान्त सम्ममा कुल बीमाशुल्क रु. ६,१६,३५,४८,६३७।- आर्जन भएको देखिन्छ । कम्पनीले कोभिडको समयमा सूचना प्रविधिको उपयोग गरी अनलाइन माध्यमबाट बीमा प्रस्ताव लिने र बीमालेख स्वीकृत गर्ने व्यवस्था मिलाएको निरन्तर व्यवसाय हुन सकेको देखिन्छ । ग्राहकहरुलाई यलिष्टिभ एवथभलत नभतधवथ मार्फत बीमाशुल्क तिर्ने व्यवस्था मिलाएकोले बीमाशुल्क भुक्तानीमा सहज हुन गएको छ ।

#### (ख) राष्ट्रिय तथा अन्तर्राष्ट्रिय परिस्थितिबाट कम्पनीको कारोवारलाई कुनै असर परेको भए सो असर :

कोभिडको कारण समग्र विश्व अर्थतन्त्र प्रभावित हुन पुगेको कारण आर्थिक क्षेत्र अपेक्षाकृत चलायमान हुन सकेन। दुई वर्ष भन्दा बिंढ कोभिडको त्रासवाट बिश्व नै गुज्जिन पुगेकोले समग्र बिश्व अर्थतन्त्र किठन मोडमा पुग्न गएको थियो। विश्व आर्थिक समस्यावाट गुजिरहेकोले सो को प्रभाव नेपाली अर्थतन्त्रमा पर्नु स्वभाविक नै हो। कोभिडको कारण आर्थिक क्षेत्र चलायमान नहुँदा र आम मानिसको आयश्रोतमा सस आउँदा कम्पनीको जीवन बीमा व्यवसायमा असर पर्न गएको देखिन्छ। यसैगरी जीवन बीमा व्यवसाय विस्तारको लागि राज्यको तर्फबाट प्रभावकारी नीतिगत व्यवस्थाहरु हुन नसकेको कारण पिन बीमा व्यवसायले उचित गित लिन सकेको देखिदैन। कोभिड-१९ पिछको जीवन बीमा व्यवसायको अवस्थालाई मध्यनजर गरी सरकारले जीवन बीमा व्यवसाय प्रवर्द्धन तथा वृद्धि गर्न अनुकुल वातावरण बनाउन आवश्यक देखिन्छ।

Responsibilities of management and Those Charged with Governance for the Financial Statement

Management is responsible for the preparation and fair presentation of these financial statements in accordance with Nepal Financial Reporting Standards and other regulatory requirement and for such internal control as management determines is necessary to enable the preparation of financial statements that are free from material misstatement, whether due to fraud or error.

In preparing the financial statements, management is responsible for assessing the Company's ability to continue as a going concern, disclosing, as applicable, matters related to going concern and using the going concern basis of accounting unless management either intends to liquidate the Company or to cease operation, or has not realistic alternative but to do so.

Those charged with governance are responsible for overseeing the Company's financial reporting process.

#### Auditor's responsibility for the audit of financial statements

Our objectives are to obtain reasonable assurance about whether the financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditor's report that includes our opinion. Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with NSAs will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of financial statement users taken on the basis of these financial statements.

As part of an audit conducted in accordance with NSAs, we exercise professional judgement and maintain professional scepticism throughout the audit. We also:

- Identify and assess the risks of material misstatement of the financial statements, whether due to fraud or
  error, design and perform audit procedures responsive to those risks, and obtain audit evidence that is
  sufficient and appropriate to provide a basis for our opinion. The risk of not detecting a material
  misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve
  collusion, forgery, intentional omissions, misrepresentations, or the override of internal control.
- Obtain an understanding of internal control relevant to the audit in order to design audit procedures that
  are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness
  of the entity's internal control.
- Evaluate the appropriateness of accounting policies used and the reasonableness of accounting estimates and related disclosures made by Management.
- Conclude on the appropriateness of the management's use of the going concern basis of accounting and, based on the audit evidence obtained, whether a material uncertainty exists related to events or conditions that may cast significant doubt on the company's ability to continue as a going concern. If we conclude that a material uncertainty exists, we are required to draw attention in our auditor's report to the related disclosures in the financial statements or, if such disclosures are inadequate, to modify our opinion. Our conclusions are based on the audit evidence obtained up to the date of our auditor's report. However, future events or conditions may cause the company to cease to continue as a going concern; and,
- Evaluate the overall presentation, structure and content of the financial statements, including the
  disclosures, and whether the financial statements represent the underlying transactions and events in
  manner that achieves fair presentation.

We communicate with Management regarding, among other matters, the planned scope and timing of the audit and significant audit findings, including any significant deficiencies in internal control that we identify during our audit.

#### Report on matters required under Company Act, 2063

Pursuant to the legal requirement under section 115(3) of Companies Act, 2063 with respect to our responsibilities to report, we report that:

- We have obtained all the information and explanations, which to the best of our knowledge and belief
  were necessary for the purpose of our audit;
- In our opinion, the financial statements referred in this report have been prepared in accordance with Company Act, 2063 and are in agreement with the books of account maintained by the company;
- 3. In our opinion, proper books of account as required by prevailing law have been kept by the company so far as appears from our examination of such books;

4. To the best of our information and according to explanations given to us and from our examination of the books of account of the company necessary for the purpose of our audit, we have not come across cases where Board of Directors or any employee of the company have acted contrary to the provisions of law, or committed any misappropriation or caused loss or damage to the company.

Historical cost is generally Fair Value of the consideration given in exchange for goods & services.

Fair value is the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date, regardless of whether that price is directly observable or estimated using another valuation technique.

In addition, for Financial Reporting purposes, Fair Value measurements are categorized into Level 1, or 2, or 3 based on the degree to which the inputs to the Fair Value measurements are observable & the significance of the inputs to the Fair Value measurement in its entirety, which are described as follows:

- Level 1 Inputs are quoted prices (unadjusted) in active markets for identical Assets or Liabilities that the entity can access at the measurement date;
- Level 2 Inputs are inputs, other than quoted prices included within Level 1, that are observable for the Asset or Liability, either directly or indirectly; and
- Level 3 Inputs are unobservable inputs for the Asset or Liability.

## 3. Significant Accounting Policies

This note provides a list of the significant policies adopted in the preparation of these Financial Statements.

## a) Property, Plant and Equipment (PPE)

#### i. Recognition

Freehold land is carried at historical cost and other items of property, plant and equipment are stated at cost of acquisition or construction less accumulated depreciation when, it is probable that future economic benefits associated with the item will flow to the Company and it can be used for more than one year and the cost can be measured reliably.

Subsequent costs are included in the asset's carrying amount or recognized as a separate asset, as appropriate, only when it meets the recognition criteria as mentioned above. The carrying amount of any component accounted for as a separate asset is derecognized when replaced. All other repairs and maintenance are charged to statement of profit or loss during the reporting period in which they are incurred.

#### ii. Revaluation

After recognition as an asset, lands and buildings whose fair value can be measured reliably, have been carried at revalued amount at the date of revaluation less any subsequent accumulated depreciation and subsequent accumulated impairment losses. Valuations are being performed to ensure that the fair value of a revalued asset does not materially differ from its carrying amount as at the reporting date. Valuation of the land and buildings are undertaken by professionally qualified valuers.

An increase in the carrying amount as a result of revaluation, is recognized in other comprehensive income and accumulated in equity under the heading of revaluation reserve. However, the increase is recognized in profit or loss to the extent that it reverses a revaluation decrease of the same asset previously recognized in profit and loss. A decrease in the carrying amount as a result of revaluation, is recognized in profit and loss. However, the decrease is recognized in other comprehensive income to the extent of any credit balance existing in the revaluation surplus in respect of that asset.

An increase in the carrying amount as a result of revaluation, is recognized in other comprehensive income and accumulated in equity under the heading of revaluation reserve. However, the increase is recognized in profit or loss to the extent that it reverses a revaluation decrease of the same asset previously recognized in profit and loss. A decrease in the carrying amount as a result of revaluation, is recognized in profit and loss. However, the decrease is recognized in other comprehensive income to the extent of any credit balance existing in the revaluation surplus in respect of that asset.

Additionally, accumulated depreciation as at the revaluation date is eliminated against the gross carrying amount of the asset and the net amount is restated to the revalued amount of the asset. Upon disposal, any revaluation reserve relating to the particular asset being sold is transferred directly to retained earnings.

Difference between depreciation on the revalued carrying amount of the asset and depreciation based on the asset's original cost is transferred to retained earnings.

#### iii. Depreciation

Depreciation on Property, Plant and Equipment other than Freehold Land i.e. the Company's Freehold Building, Plant & Machinery, Vehicles & Other Assets is provided on "Straight Line Method (SLM)/Diminishing Balance Method (DBM)" based on Useful Life estimated by technical expert of the management.

The Assets Useful Life/ Rate of Depreciation and Residual Values are reviewed at the Reporting date and the effect of any changes in estimates are accounted for on a prospective basis.

Useful Life of Property, Plant and Equipment based on SLM/ DBM is categorized as stated below:

List of Asset Categories	Useful Life (In Years) for SLM	Rate of Depreciation (In %) for DBM	
Land	Not Applicable	Not Applicable	
Buildings	20	5%	
Leasehold Improvement	Lease Period (5 years)	Lease Period (20%)	
Furniture & Fixtures	5	20%	
Computers and IT Equipments	5	20%	
Office Equipment	5	20%	
Vehicles	5	20%	
Other Assets	5	20%	

Note: Useful life/Rate of Depreciation are recommendary only. Insurer may adopt other alternatives as per their management estimate.

#### iv. Derecognition

An item of Property and Equipment is derecognized upon disposal or when no Future Economic Benefits are expected to arise from the continued use of the Asset. Any Gain or Loss arising on the disposal or retirement of an item of Property and Equipment is determined as the difference between the sales proceeds and the carrying amount of the Asset and is recognized in the Statement of Profit or Loss.

#### v. Impairment of Assets

Assets are tested for impairment whenever events or changes in circumstances indicate that the carrying amount may not be recoverable. An impairment loss is recognized for the amount by which the Asset's carrying amount exceeds its recoverable amount. The recoverable amount is higher of an asset's fair value less cost of disposal and value in use. Value in use is based on the estimated future cash flows, discounted to their present value using pre-tax discount rate that reflects current market assessments of the time value of money and risk specific to the assets. Assets that suffer an impairment are reviewed for possible reversal of the impairment at the end of each reporting period. In case of such reversal, the carrying amount of the asset is increased so as not to exceed the carrying amount that would have been determined had there been no impairment loss.

#### vi. Capital Work-In-Progress

These are expenses of capital nature directly incurred in the construction of buildings, major plant and machinery and system development which are to be capitalized. Capital Work in Progress would be transferred to the relevant asset when it is available for use. Capital Work in Progress is stated at cost less any accumulated impairment losses.

#### b) Intangible Assets

#### i. Recognition

Intangible assets acquired separately are measured on initial recognition at cost. Following initial recognition, intangible assets are carried at cost less any accumulated amortization and any accumulated impairment losses. Internally generated intangibles, excluding capitalized development costs, are not capitalized and the related expenditure is reflected in Statement of profit or loss in the year in which the expenditure is incurred.

#### ii. Amortization

The useful lives of intangible assets are assessed to be either finite or indefinite. An intangible asset shall be regarded as having an indefinite useful life when, based on an analysis of all of the relevant factors, there is no foreseeable limit to the period over which the asset is expected generate net cash inflow for the entity.

Amortisation is recognized in statement of profit or loss on straight line method (SLM) over the estimated useful life of the intangible assets/diminishing balance method (DBM), from the date that it is available for use since this most closely reflects the expected pattern of consumption of the future economic benefits embodied in the asset. The amortisation period and the amortisation method for an intangible asset with a finite useful life are reviewed at least at each financial year end. Changes in the expected useful life or the expected pattern of consumption of future economic benefits embodied in the asset are considered to modify the amortisation period or method, as appropriate, and are treated as changes in accounting estimates. The amortisation expense on intangible assets with finite lives is recognized in the statement of profit or loss.

Useful Life of Intangible Assets based on SLM/ DBM is categorized as stated below:

e	e	
List of Asset Categories	Useful Life	Rate of Depreciation
List of Asset Categories	(In Years) for SLM	(In %) for DBM
Softwares	5	20%
Licenses	License Period	License Period
Others (to be Specified)		

Note: Useful life/Rate of Depreciation are recommendary only. Insurer may adopt other alternatives as per their management estimate.

#### iii. Derecognition

An Intangible Asset is derecognized when no Future Economic Benefits are expected to arise from the continued use of the Asset. Any Gain or Loss arising on the derecognition is determined as the difference between the sales proceeds and the carrying amount of the Asset and is recognized in the Statement of Profit or Loss.

#### iv. Impairment of Assets

The Company assesses at each reporting date as to whether there is any indication that Intangible Assets may be impaired. If any such indication exists, the recoverable amount of an asset is estimated to determine the extent of impairment, if any. An impairment loss is recognized in the Statement of Profit and Loss to the extent, asset's carrying amount exceeds its recoverable amount. The recoverable amount is higher of an asset's fair value less cost of disposal and value in use. Value in use is based on the estimated future cash flows, discounted to their present value using pre-tax discount rate that reflects current market assessments of the time value of money and risk specific to the assets.

#### c) Investment Properties

#### **Cost Model:**

Property that is held for rental income or for capital appreciation or both, is classified as investment property. Investment properties are measured initially at cost, including related transaction cost. It is subsequently carried at cost less accumulated depreciation. Subsequent expenditure is capitalized to the asset's carrying amount only when it is probable that future economic benefits associated with the expenditure will flow to the Company and the cost can be measured reliably. All other repairs and maintenance costs are expensed when incurred.

Investment properties are derecognized either when they have been disposed of, or when the investment property is permanently withdrawn from use and no future economic benefit is expected from its disposal. Any gains or losses on the retirement or disposal of an investment property are recognized in the statement of profit or loss in the year of retirement or disposal.

Transfers are made to (or from) investment property only when there is a change in use. For a transfer from investment property to PPE, the deemed cost for subsequent accounting is the fair value at the date of change in use. If PPE becomes an investment property, the Company accounts for such property in accordance with the policy stated under PPE up to the date of change in use.

#### OR

#### Fair Value Model:

Investment properties are measured initially at cost, including transaction costs. Subsequent to initial recognition, investment properties are stated at fair value, which reflects market conditions at the reporting date. Gains or losses arising from changes in the fair values of investment properties are included in the statement of profit or loss in the year in which they arise, including the corresponding tax effect.

The fair value of investment property is determined by an external, independent property valuer, having appropriate recognized professional qualification and recent experience in the location and category of property being valued.

Investment properties are derecognised either when they have been disposed of, or when the investment property is permanently withdrawn from use and no future economic benefit is expected from its disposal. Any gains or losses on the retirement or disposal of an investment property are recognised in the statement of profit or loss in the year of retirement or disposal.

Transfers are made to (or from) investment property only when there is a change in use. For a transfer from investment property to PPE, the deemed cost for subsequent accounting is the fair value at the date of change in use. If PPE becomes an investment property, the Company accounts for such property in accordance with the policy stated under PPE up to the date of change in use.

## d) Cash & Cash Equivalent

For the purpose of presentation in the Statement of Cash Flows, Cash & Cash Equivalents includes Cash in Hand, Bank Balances and short-term deposits with a maturity of three months or less.

#### e) Financial Assets

#### i. Initial Recognition & Measurement

Financial Assets are recognized when, and only when, the Company becomes a party to the contractual provisions of the Financial Instrument. The Company determines the classification of its Financial Assets at initial recognition.

When Financial Assets are recognized initially, they are measured at Fair Value, plus, in the case of Financial Assets not at fair value through profit or loss, transaction costs that are attributable to the acquisition of the Financial Asset. Transaction costs of Financial Assets carried at Fair Value through Profit or Loss are expensed in the Statement of Profit or Loss.

#### ii. Subsequent Measurement

#### a. Financial Assets carried at Amortized Cost (AC)

A Financial Asset is measured at amortized cost if it is held within a business model whose objective is to hold the asset in order to collect contractual cash flows and the contractual terms of the Financial Asset give rise on specified dates to cash flows that are solely payments of principal and interest on the principal amount outstanding. Interest income from these financial assets is measured using effective interest rate method.

#### b. Financial Assets at Fair Value through Other Comprehensive Income (FVTOCI)

A Financial Asset is measured at FVTOCI if it is held within a business model whose objective is achieved by both collecting contractual cash flows and selling Financial Assets and the contractual terms of the Financial Asset give rise on specified dates to cash flows that are solely payments of principal and interest on the principal amount outstanding. These financial assets are measured at fair value and changes are taken to statement of other comprehensive income.

#### c. Financial Assets at Fair Value through Profit or Loss (FVTPL)

A Financial Asset which is not classified in any of the above categories are measured at FVTPL. These financial assets are measured at fair value and changes are taken to statement of profit or loss.

#### iii. De-Recognition

A Financial Asset is derecognized only when the Company has transferred the rights to receive cash flows from the Financial Asset. Where the Company has transferred an Asset, the Company evaluates whether it has transferred substantially all risks and rewards of ownership of the Financial Asset. In such cases, the Financial Asset is derecognized. Where the Company has not transferred substantially all risks and rewards of ownership of the Financial Asset, the Financial Asset is not derecognized. Where the Company retains control of the Financial Asset, the Asset is continued to be recognized to the extent of continuing involvement in the Financial Asset.

#### iv. Impairment of Financial Assets

The Company assesses at each reporting date whether there is objective evidence that a financial asset or group of financial assets is impaired. A financial asset or a group of financial assets is deemed to be impaired if, there is objective evidence of impairment as a result of one or more events that has occurred since the initial recognition of the asset (an incurred 'loss event') and that loss event has an impact on the estimated future cash flows of the financial asset or the group of financial assets that can be reliably estimated. Evidence of impairment may include indications that a financial asset or a group of financial assets is experiencing significant financial difficulty, default or delinquency in interest or principal payments, the probability that they will enter bankruptcy or other financial reorganization and observable data indicating that there is a measurable decrease in the estimated future cash flows, such as changes in arrears or economic conditions that correlate with defaults.

# Expected Credit Loss for Impairment of Financial Assets is applicable after implementation of NFRS 9

In accordance with NFRS 9 "Financial Instrument", the Company uses 'Expected Credit Loss' (ECL) Model, for evaluating impairment of Financial Assets other than those measured at Fair Value through Profit or Loss (FVTPL).

Expected Credit Losses are measured through a loss allowance at an amount equal to:

The 12-months Expected Credit Losses (Expected Credit Losses that result from those default events on the Financial Instrument that are possible within 12 months after the reporting date); or

Full Lifetime Expected Credit Losses (Expected Credit Losses that result from all possible default events over the life of the Financial Instrument)

For other assets, the Company uses 12 months Expected Credit Losses to provide for impairment loss where there is no significant increase in credit risk. If there is significant increase in credit risk Full Lifetime ECL is used.

#### f) Financial Liabilities

#### i. Initial Recognition & Measurement

Financial Liabilities are recognized when, and only when, the Company becomes a party to the contractual provisions of the Financial Instrument. The Company determines the classification of its Financial Liabilities at initial recognition.

All Financial Liabilities are recognized initially at Fair Value, plus, in the case of Financial Liabilities not at fair value through profit or loss, transaction costs that are attributable to the issue of the Financial Liability.

#### ii. Subsequent Measurement

After initial recognition, Financial Liabilities are subsequently measured at amortized cost using the Effective Interest Method.

For trade and other payables maturing within one year from the date of Statement of Financial Position, the carrying amounts approximate Fair value due to short maturity of these instruments.

#### iii. De-Recognition

A Financial Liability is de-recognized when the obligation under the liability is discharged or cancelled or expires. When an existing Financial Liability is replaced by another from the same lender on substantially different terms, or the terms of an existing liability are substantially modified, such an exchange or modification is treated as a de-recognition of the original liability and the recognition of a new liability, and the difference in the respective carrying amounts is recognized in the Statement of Profit or Loss.

#### g) Offsetting financial instruments

Financial assets and liabilities are offset and the net amount is reported in the statement of financial position where there is legally enforceable right to offset the recognized amounts and there is an intention to settle on a net basis or realize the asset and settle the liability simultaneously. The legally enforceable right must not be contingent on future events and must be enforceable in the normal course of business and in the event of default, insolvency or bankruptcy of the Company or the counterparty.

#### h) Reinsurance Assets

Reinsurance assets are the assets which are created against insurance contract liabilities of the amount which are recoverable from the reinsurers. These assets are created for the Reinsurer's share of Insurance Contract Liabilities.

A reinsurance asset is impaired if there is objective evidence, as a result of an event that occurred after the initial recognition of the reinsurance asset, that the Company may not receive all amounts due to it under the terms of the contract, and the event has a reliably measurable impact on the amount that the company will receive from the re-insurer. If a reinsurance asset is impaired, the company reduces the carrying amount accordingly and is recognized in statement of profit or loss.

#### i) Share Capital

Financial Instruments issued by the Company are classified as Equity only to the extent that they do not meet the definition of a Financial Liability or Financial Asset.

#### j) Reserves and Funds

- i. Share Premium: If the Company issues share capital at premium, it receives extra amount other than share capital such amount is transferred to share premium. The amount in share premium is allowed for distribution of bonus shares.
- ii. Catastrophe Reserves: The Company has allocated catastrophe reserve for the amount which is 10% of the distributable profit for the year as per Regulator's Directive.
- iii. Fair Value Reserves: The Company has policy of creating fair value reserve equal to the amount of Fair Value Gain recognized in statement of other comprehensive income as per regulator's directive.
- iv. Regulatory Reserves: Reserve created out of net profit in line with different circulars issued by Insurance Board.
- v. Actuarial Reserves: Reserve against actuarial gain or loss on present value of defined benefit obligation resulting from, experience adjustments (the effects of differences between the previous actuarial assumptions and what has actually occurred); and the effects of changes in actuarial assumptions.
- vi. Cashflow Hedge Reserves: Is the exposure to variability in cash flows that is attributable to a particular risk associated with all or a component of a recognized asset or liability or a highly probable forecast transaction, and could affect profit or loss. Reserve represents effective portion of the gain or loss on the hedging instrument recognized in other comprehensive income.
- vii. Revaluation Reserves: Reserve created against revaluation gain on property, plant & equipment & intangible assets, other than the reversal of earlier revaluation losses charged to profit or loss.
- viii. Other Reserves: Reserve other than above reserves, for e.g., deferred tax reserve, others (to be specified)

#### k) Insurance Contract Liabilities

i. Provision for unearned premiums

Unearned premiums reserve represents the portion of the premium written in the year but relating to the unexpired term of coverage.

Change in reserve for unearned insurance premium represents the net portion of the gross written premium transferred to the unearned premium reserve during the year to cover the unexpired period of the polices.

ii. Outstanding claims provisions

Outstanding claims provisions are based on the estimated ultimate cost of all claims incurred but not settled at the statement of financial position date, whether reported or not, together with related claims handling costs.

iii. Unapportioned surplus

Unapportioned surplus where the amount are yet to be allocated or distributed to either policyholders or shareholders by the end of the financial period, and held within the insurance contract liabilities.

#### Liability adequacy

At each reporting date, the Company reviews its unexpired risk and a liability adequacy test is performed to determine whether there is any overall excess of expected claims and deferred acquisition costs over unearned premiums. The calculation uses current estimates of future contractual cash flows after taking account of the investment return expected to arise on assets relating to the relevant life insurance technical provisions. If these estimates show that the carrying amount of the unearned premiums is inadequate, the deficiency is recognized in the statement of profit or loss by setting up a provision for liability.

#### 1) Employee Benefits

#### i. Short Term Obligations

Liabilities for wages and salaries, including non-monetary benefits that are expected to be settled wholly within 12 months after the end of the period in which the employees render the related service are recognized in respect of employees' services up to the end of the reporting period and are measured at the amounts expected to be paid when the liabilities are settled. The liabilities are presented as current employee benefit obligations in the Statement of Financial Position.

#### ii. Post - Employment Benefits

#### - Defined Contribution Plan

The Company pays Provident Fund contributions to publicly administered Provident Funds as per local regulations. The Company has no further payment obligations once the contributions have been paid. The contributions are accounted for as defined contribution plans and the contribution are recognized as Employee Benefit Expense when they are due.

#### - Defined Benefit Plan

For Defined Benefit Plan, the cost of providing benefits is determined using the Projected Unit Credit Method, with Actuarial Valuations being carried out at each Statement of Financial Position. Actuarial Gains & Losses are recognized in the Other Comprehensive Income in the period in which they occur. Past service cost is recognized immediately to the extent that the benefits are already vested and otherwise is amortized on a Straight-Line Basis over the average period until the benefits become vested. The retirement benefit obligation recognized in the Statement of Financial Position represents the present value of the defined benefit obligation as adjusted for unrecognized past service cost, as reduced by the Fair Value of plan Assets (If Any). Any Asset resulting from this calculation is limited to past service cost, plus the present value of available refunds and reductions in future contributions to the plan.

#### iii. Long Term Employee Benefits

The liabilities for un-availed earned leaves are not expected to be settled wholly within 12 months after the end of the period in which the employees render the related service. Leave Encashment has been computed using Actuarial Assumptions and these are measured at the present value of expected future payments to be made in respect of services provided by employees up to the end of the year using the Projected Unit Credit Method. The benefits are discounted using the market yields at the end of the year that have terms approximating to the terms of assumptions.

#### iv. Termination

Termination benefits are payable when employment is terminated by the Company before the normal retirement date, or when an employee accepts voluntary retirement in exchange of these benefits. The Company recognizes termination benefits at the earlier of the following dates:

- a) when the Company can no longer withdraw the offer of those benefits; and
- b) when the entity recognizes costs for a restructuring that is within the scope of NAS 37 and involves the payment of termination benefits.

The termination benefits are measured based on the number of employees expected to accept the offer in case of voluntary retirement scheme.

#### m) Revenue Recognition

#### i. Gross Premium

Gross recurring premiums on life insurance contracts are recognized as and when premium is received.

#### ii. Unearned Premium Reserves

Unearned premiums are those proportions of premiums written in a year that relate to periods of risk after the reporting date. Unearned premiums are calculated on a pro rata basis. The proportion attributable to subsequent periods is deferred as a provision for unearned premiums.

#### iii. Reinsurance Premium

Reinsurance premiums written comprise the total premiums payable for the whole cover provided by contracts entered into the period and are recognized on the date on which the policy incepts. Premiums include any adjustments arising in the accounting period in respect of reinsurance contracts incepting in prior accounting periods. Unearned reinsurance premiums are those proportions of premiums written in a year that relate to periods of risk after the reporting date. Reinsurance premiums and claims on the face of the statement of profit or loss have been presented as negative items within premiums and net benefits and claims, respectively, because this is consistent with how the business is managed.

#### iv. Fees and commission income

Commission Income shall be recognised on as soon as the income can be reliably measured. If the income is for future periods, then they are deferred and recognised over those future periods.

#### v. Investment income

Interest income is recognised in the statement of profit or loss as it accrues and is calculated by using the EIR method. Fees and commissions that are an integral part of the effective yield of the financial asset are recognised as an adjustment to the EIR of the instrument.

Investment income also includes dividends when the right to receive payment is established.

#### vi. Net realized gains and losses

Net realized gains and losses recorded in the statement of profit or loss include gains and losses on financial assets and properties. Gains and losses on the sale of investments are calculated as the difference between net sales proceeds and the original or amortised cost and are recorded on occurrence of the sale transaction.

### n) Benefit, Claims and Expenses

#### i. Gross Benefits and Claims

Benefits and claims include the cost of all claims arising during the year, including external claims handling costs that are directly related to processing and settlements of claims. Benefits and claims that are incurred during the financial year are recognised when a claimable event occurs and/or the insurer is notified. Death, surrender and other benefits without due dates are treated as claims payable, on the date of receipt of intimation of death of the assured or occurrence of contingency covered.

#### ii. Reinsurance Claims

Reinsurance claims are recognised when the related gross insurance claim is recognised according to the terms of the relevant contracts.

#### o) Product Classification

Insurance contracts are those contracts when the Company (the insurer) has accepted significant insurance risk from another party (the policyholders) by agreeing to compensate the policyholders if a specified uncertain future event (the insured event) adversely affects the policyholders. As a general guideline, the Company determines whether it has significant insurance risk by comparing benefits paid with benefits payable if the insured event did not occur. Insurance contracts can also transfer financial risk.

The Company has following portfolios under which it operates its business:

- i. Endowment This is a with profit plan that makes provisions for the family of the Life Assured in event of his early death and also assures a lump sum at a desired age on maturity. It costs moderate premiums, has high liquidity and in savings oriented. This plan is apt for people of all ages and social groups who wish to protect their families from a financial setback that may occur owing to their demise.
- ii. Anticipated This scheme provides for specific periodic payments of partial survival benefits during the term of the policy itself so long as the policy holder is alive. It is therefore suitable to meet specified financial requirements needed for occasions like Brata bandha, Academic Graduations etc. An important feature of plan is that in the event of death at any time within the policy term, the death claim comprises full sum assured without deducting any of the survival benefit amounts, which have already been paid. It is also with profit plan.
- iii. Endowment Cum Whole Life This plan is a combination of Endowment Assurance and Whole Life with profit plan. It provides financial protection against death throughout the lifetime of the life assured with the provision of payment of a lump sum at the maturity of the policy to the assured in case of his survival.
- iv. Whole Life This plan is a combination of Endowment Assurance and Whole Life with profit plan. It provides financial protection against death throughout the lifetime of the life assured with the provision of payment of a lump sum at the maturity of the policy to the assured in case of his survival.
- v. Foreign Employment Term Term life insurance, also known as pure life insurance, is life insurance that guarantees payment of a stated death benefit during a specified term. Once the term expires, the policyholder can renew it for another term, convert the policy to permanent coverage, or allow the policy to terminate.
- vi. Other Term Term life insurance, also known as pure life insurance, is life insurance that guarantees payment of a stated death benefit during a specified term. Once the term expires, the policyholder can renew it for another term, convert the policy to permanent coverage, or allow the policy to terminate.
- vii. Special Special Term insurance is a modified version of term insurance with added benefits.
- viii. Others to be Specified Life insurance policies other than above mentioned products are classified as others.

#### p) Borrowing Costs

Borrowing costs directly attributable to the acquisition, construction or production of qualifying assets, which are assets that necessarily take a substantial period of time to get ready for their intended use or sale, are added to the cost of those assets, until such time as the assets are substantially ready for their intended use or sale.

Interest income earned on the temporary investment of specific borrowings pending their expenditure on qualifying assets is deducted from the borrowing costs eligible for capitalization.

All other borrowing costs are recognized in statement of profit or loss in the period in which they are incurred.

#### q) Cash Flow Statement

Cash Flows are reported using the direct method, whereby major classes of cash receipts and cash payments are disclosed as cash flows.

#### r) Leases

#### **Finance Leases**

Leases in which the Company has substantial portion of the risks and rewards of ownership are classified as Finance Leases. Assets acquired under Finance Leases are capitalised at the lower of the Fair Value of the Leased Assets at the inception of the Lease Term & the Present Value of Minimum Lease Payments. Lease Payments are apportioned between the Finance charge and the reduction of the outstanding liability. The Finance Charge is allocated to periods during the Lease Term at a constant periodic Rate of Interest on the remaining balance of the liability.

#### **Operating Lease**

Leases in which the Company doesn't have substantial portion of the risks and rewards of ownership are classified as Operating Leases. Payment made under Operating Leases are charged to Statement of Profit & Loss on a Straight-Line Basis.

#### s) Income Taxes

Income Tax Expense represents the sum of the tax currently payable & Deferred Tax.

#### i. Current Tax

Current Tax Expenses are accounted in the same period to which the revenue and expenses relate. Provision for Current Income Tax is made for the Tax Liability payable on Taxable Income after considering tax allowances, deductions and exemptions determined in accordance with the applicable tax rates and the prevailing tax laws.

#### ii. Deferred Tax

Deferred Tax is recognized on temporary differences between the carrying amounts of Assets & Liabilities in the Statement of Financial Position and their tax bases. Deferred Tax Assets & Liabilities are recognized for deductible and taxable temporary differences arising between the tax base of Assets & Liabilities and their carrying amount in Financial Statements, except when the Deferred Tax arises from the initial recognition of goodwill, an Asset or Liability in a transaction that is not a business combination and affects neither accounting nor taxable Profits or Loss at the time of the transaction.

Deferred Tax Assets are recognized to the extent that it is probable that taxable profit will be available against which the deductible Temporary differences and the carry forward of unused tax credits and unused tax losses can be utilized.

Deferred Tax Liabilities are generally recognized for all taxable Temporary differences.

The carrying amount of Deferred Tax Assets is reviewed at each reporting date and reduced to the extent that it is no longer probable that sufficient taxable profits will be available to allow all or part of the Deferred Tax Asset to be utilized.

#### t) Provisions, Contingent Liabilities & Contingent Assets

#### i. Provisions

Provisions are recognized when the Company has a present legal or constructive obligation as a result of past events, for which it is probable that an outflow of resources embodying economic benefits will be required to settle the obligation and a reliable estimate of the amount can be made.

Provisions are measured at the present value of management's best estimate of the expenditure required to settle the present obligation at the end of the reporting period. The discount rate to determine the present value is a Pre-Tax Rate that reflects current market assessments of the time value of money and the risks specific to the liability. The increase in the provision due to the passage of time is recognized as interest expense.

Provisions for Contingent Liability are recognized in the books as a matter of abundant precaution and conservative approach based on management's best estimate. However, Management believes that chances of these matters going against the company are remote and there will not be any probable cash outflow.

#### ii. Contingent Liabilities

Contingent liabilities are recognized only when there is a possible obligation arising from past events due to occurrence or non-occurrence of one or more uncertain future events not wholly within the control of the Company or where any present obligation cannot be measured in terms of future outflow of resources or where a reliable estimate of the obligation cannot be made. Obligations are assessed on an ongoing basis and only those having a largely probable outflow of resources are provided for.

#### iii. Contingent Assets

Contingent assets where it is probable that future economic benefits will flow to the Company are not recognized but disclosed in the Financial Statements.

#### u) Functional Currency & Foreign Currency Transactions

The Financial Statements of the Company are presented in Nepalese Rupees, which is the Company's Functional Currency. In preparing the Financial Statements of the Company, transactions in currencies other than the Company's Functional Currency i.e., Foreign Currencies are recognized at the rates of exchange prevailing at the dates of the transactions.

#### v) Earnings Per Share

Basic Earnings per share is calculated by dividing the profit attributable to owners of the company by the Weighted Average Number of equity shares outstanding during the Financial Year.

For diluted earnings per share, the weighted average number of ordinary shares in issue is adjusted to assume conversion of all dilutive potential ordinary shares.

#### w) Operating Segment

Operating Segments are reported in a manner consistent with the internal reporting provided to the chief operating decision maker (CODM) as defined by NFRS 8, "Operating Segment".

Company's Income & Expenses including interest are considered as part of un-allocable Income & Expenses which are not identifiable to any business segment. Company's Asset & Liabilities are considered as part of un-allocable Assets & Liabilities which are not identifiable to any business.

- (iv) Fair value of investment properties:

The fair values of the investment properties were determined by external independent qualified valuers using Comparison/ Development/ Other (specify the name) Method.

#### Comparison Method:

This approach considers the sales of similar or substitute properties and related market data, and establishes a value estimate by adjustments made for differences in factors that affect value. In general, the investment

properties are compared with sales of similar properties that have been transacted in the open market. Listings and offers may also be considered.

#### Development Method:

When a property to be valued is fairly big and no data available from similar land but sales transaction of small plots are available, on the basis we may adopt the method of development. In this method, the properties which are in the undeveloped stage or partly developed and partly undeveloped stage, the total land is divided into number of plots after providing for roads, parks etc. In such cases, the probable selling price of divided plots, the area required for roads, parks etc and other expenses for development should be known in such a way that the similar facilities and conditions are maintained to match with the available surrounding units for compensation.

#### 45 Insurance Risk

Insurance risk includes the risk of incurring higher claims costs than expected owing to the random nature of claims, frequency and severity and the risk of change in the legal or economic conditions of insurance or reinsurance cover. This may result in the insurer having either received too little premium for the risks it has agreed to underwrite and hence has not enough funds to invest and pay claims, or that claims are in excess of those expected.

The Company seeks to minimize insurance risk through a formalized reinsurance arrangement with an appropriate mix and spread of business between classes of business based on its overall strategy. This is complemented by observing formalized risk management policies.

The Company considers insurance risk to be a combination of the following components of risks:

- a) Product development
- b) Pricing
- c) Underwriting and
- d) Claims Handling
- e) Reinsurance
- f) Reserving

#### a) Product development:

The Company principally issues the following types of Life Insurance contracts:

- Endowment
- Anticipated Endowment
- Endowment Cum Whole Life
- Whole Life
- Foreign Employment Term
- Other Term
- Special Term
- Others (to be specified)

The above risk exposure is mitigated by the diversification across a large portfolio of insurance contracts and geographical areas. The variability of risks is improved by careful selection and implementation of underwriting strategies, which are designed to ensure that risks are diversified in terms of type of risk and level of insured benefits.

Furthermore, strict claim review policies to assess all new and ongoing claims, regular detailed review of claims handling procedures and frequent investigation of possible fraudulent claims are put in place to reduce the risk exposure of the Company. The Company further enforces a policy of actively managing and promptly pursuing claims, in order to reduce its exposure to unpredictable future developments that can negatively impact the business.

#### b) Pricing:

The pricing of an insurance product involves the estimation of claims, operational and financing costs and the income arising from investing the premium received. The pricing process typically comprises collecting data on the underlying risks to be covered, determining the pricing assumptions and the base rate, setting the final premium rate, and monitoring the review of the appropriateness of pricing.

The Company collects adequate data to validate the reasonableness of the underlying assumptions used for pricing. The base rate represents the amount required to meet the value of anticipated benefits, expenses, and margins for risks and profit. Data primarily relates to the company's own historical experience and that of the industry where relevant. These may be supplemented by other internal and external data, and could include trends observed in claims costs and expenses.

Pricing is done by modelling all identified risks, using appropriate methodologies depending on the complexity of the risks and available data. Adequate buffers are kept in the premiums to cushion against the risk that actual experience may turn out to be worse than expected.

#### c) Underwriting:

The Company's underwriting process is governed by the by the internal underwriting procedures. Some of the actions undertaken to mitigate underwriting risks are detailed below:

- i) Investments are made on the training and development of underwriting and claims management staff, including those attached to the distribution network.
- ii) Application of Four-Eye principle on underwriting process.
- iii) Pre-underwriting inspections are made on new business over a predetermined threshold to evaluate risk prior to acceptance.
- iv) Post-underwriting reviews are conducted to ensure that set guidelines have been observed.
- v) Adequate reinsurance arrangements are in place and reviews are undertaken to ensure the adequacy of these covers.

#### d) Claims handling:

The Company considers insurance claim risk to be a combination of the following components of risks:

- i) Mortality Risk risk of loss arising due to policyholder death experience being different than expected
- ii) Longevity Risk risk of loss arising due to the annuitant living longer than expected
- iii) Investment Return Risk risk of loss arising from actual returns being different than expected
- iv) Expense Risk risk of loss arising from expense experience being different than expected
- v) Policyholder Decision Risk risk of loss arising due to policyholder experiences (lapses and surrenders) being different than expected

#### Assumptions

The assumptions that have the greatest effect on the statement of financial position and statement of profit or loss of the Company are listed below:

Particulars	Current Year				Previous Year

#### Sensitivities

The life insurance claim liabilities are sensitive to the key assumptions as mentioned in the table below. The following analysis is performed for reasonably possible movements in key assumptions with all other assumptions held constant, showing the impact on gross and net liabilities, profit before tax and profit after tax. The correlation of assumptions will have a significant effect in determining the ultimate claims liabilities, but to demonstrate the impact due to changes in assumptions, assumptions had to be changed on an individual basis.

#### e) Reinsurance

The Company purchases reinsurance as part of its risk's mitigation programme. Premium ceded to the reinsurers is in accordance with the terms of the programmes already agreed based on the risks written by the insurance companies. Recoveries from reinsurers on claims are based on the cession made in respect of each risk and is estimated in a manner consistent with the outstanding claims provisions made for the loss. Although we mitigate our exposures through prudent reinsurance arrangements, the obligation to meet claims emanating from policy holders rests with the Company. Default of reinsurers does not negate this obligation and in that respect the Company carries a credit risk up to the extent ceded to each reinsurer.

#### f) Reserving

Insurance Contract Liabilities are created to cover this risk based on the actuarial valuation report. The table below sets out the concentration of risk associated with above mentioned products. Risk as at year end has been measured as insurance contract liabilities and disclosed as below:

#### 46 Fair Value Measurements

#### i. Financial Instruments by Category & Hierarchy

This section explains the judgements and estimates made in determining the Fair Values of the Financial Instruments that are (a) recognized and measured at fair value and (b) measured at Amortized Cost and for which Fair Values are disclosed in the Financial Statements.

To provide an indication about the reliability of the inputs used in determining Fair Value, the Company has classified its financial instruments into Three Levels prescribed as per applicable NFRS.

Level 1: Level 1 Hierarchy includes Financial Instruments measured using Quoted Prices.

Level 2: Fair Value of Financial Instruments that are not traded in an active market is determined using valuation techniques which maximizes the use of observable market data and rely as little as possible on entity-specific estimates. If all significant inputs required to determine Fair Value of an instrument are observable, the instrument is included in Level 2.

Level 3: If one or more of the significant inputs is not based on observable market data, the instrument is included in Level 3.

There is no transfer of Financial Instruments between different levels as mentioned above during the year.

- ii. Valuation Technique Used to Determine Fair Value
  - a) Use of quoted market prices or dealer quotes for similar instruments
  - b) Fair Value of remaining financial instruments is determined using discounted cash flow analysis

#### iii. Valuation Process

The finance and accounts department of the Company performs the valuation of financial assets and liabilities required for financial reporting purposes. Discussion on valuation processes and results are held at least once in a year.

The main level 3 inputs are derived and evaluated as follows:

- a) Discount rate is arrived at considering the internal and external factors.
- b) Discounting has been applied where assets and liabilities are non-current, and the impact of the discounting is material

The carrying amounts of cash and cash equivalents are considered to be the same as their fair values, due to their short-term nature.

#### 47 Financial Risk Management

The Company's activities expose it to Credit Risk, Liquidity Risk & Market Risk.

#### i. Credit Risk

Credit risk is the risk of financial loss as a result of the default or failure of third parties to meet their payment obligations to the Company. Thus, for an insurance contract, credit risk includes the risk that an insurer incurs a financial loss because a reinsurer defaults on its obligations under the reinsurance contract

# The following policies and procedures are in place to mitigate the Company's exposure to credit risk:

- a) Company has credit risk policy which sets out the assessment and determination of what constitutes credit risk for the Company. Compliance with the policy is monitored and exposures and breaches are reported to the Company's risk committee. The policy is regularly reviewed for pertinence and for changes in the risk environment.
- b) Reinsurance is placed with counterparties that have a good credit rating and concentration of risk is avoided by entering into agreement with more than one party. At each reporting date, management performs an assessment of creditworthiness of reinsurers and updates the reinsurance purchase strategy, ascertaining suitable allowance for impairment.
- c) The company deals with only creditworthy counterparties and obtains sufficient collateral where appropriate, as a means of mitigating the risk of financial loss from defaults.
